

Historic Preservation Board

Historic Salvage Materials Application

The Lafayette Historic Preservation Board (HPB) has an inventory of materials salvaged from historic buildings around the city.

These materials are available for re-use, in either building improvement projects or artistic projects, as described below. A listing of current inventory is maintained here:

www.cityoflafayette.com/historic

Requirements:

- The building project or artistic project must be within Lafayette city limits.
- For building projects, the owner of the building or structure must approve the application but the owner, tenant, or owner's representative may submit it.
- Applicant must pick up materials from the storage location.
- Project must be completed within **6 months** of receiving materials.

Other Considerations:

- For building projects, residential and commercial buildings and structures, including outbuildings (barns, garages etc.) of any age are eligible. However priority is given to those at least 50 years old.
- New construction and additions are eligible, however priority is given to repairing historic features or replacing non-historic materials with historic ones.
- Priority is given to building projects over artistic projects.
- Monetary donations are accepted but not required.
- The HPB may publicize your project in the local media.

Application Review Process:

The HPB City liaison will screen applications to verify project eligibility. If any additional information is required, the liaison will contact the applicant directly. The HPB will then evaluate the applications during its next public meeting, at which time applicants may make statements. The HPB will then make recommendation to the City regarding award of materials.

APPLICATION

Historic Preservation Board - Historic Materials Usage

Please type or print clearly in pen.

Questions: Email to: greg.thompson@cityoflafayette.com OR call 303-661-1265

Submission: Email to: greg.thompson@cityoflafayette.com OR

Mail printed copy to: HPB Historic Salvage Materials, 1290 S. Public Rd., Lafayette, CO 80026

Name: _____
